CHCR De-Escalation Guide

Essential steps to manage conflict and promote safety in challenging situations

01	Recognize Identify signs of escalation through body language and vocal tone.
02	Respond Use a calm voice to listen actively, acknowledging feelings without judgment for better understanding.
03	Set Limits Establish clear boundaries and offer choices to the individual, ensuring a sense of control.
04	Engage Non-Verbally Maintain an open posture and relaxed facial expression to promote a safe environment.
05	Reflect and Learn After the situation, take time to debrief, document, and prioritize self-care for future improvement.

De-escalation begins where judgment ends. When we choose to connect instead of control.
